

17:00 - 20:00 - FSDI 104 Session #3 Cohort 28

this is the code to create elements in the HTML DOM using JS.

```
let li = document.createElement("li");// creating the li tag
let text = document.createTextNode(pet.name);
li.appendChild(text);
petsDiv.appendChild(li);
```

Explanation of how the HTML and JS is working.

Explanation for the assignment (display the pets in a table).
