17:00 - 20:00 - FSDI 101 Session #2 Cohort 28

▼ Event Notes

- CSS is Cascade so the last element has preference over the other (overriding).
- You can use classes in any element.
- Make sure that you have the values (px, %).
- We have three types of CSS: inline, internal and external.
- HTML is <> language.
- CSS uses

```
selector {
    property : value ;
}
```

- Use href to link a file (to link the css file).
- There are three types of selectors (tagname, class name, id)
- * is selecting all the elements.

Assignment notes:

- background-color, font-size, color, text-shadow, letter-spacing, line-height …
- border and border-radius

Extra research:

- normalize
- some css properties
